Artist's Statement
Cheryl Gunn

I have always loved working with color and fabric. A few years ago I discovered the fun in creating my own designs. While there are many wonderful patterns in the world I often found myself changing something about them to suit my own style and taste. This was the catalyst to create my own designs and start marketing patterns. In 1995, I started "Waltzing With Bears".

My inspirations are often found in the great outdoors. I'm an Idaho girl and quilter so I love the mountains, flowers and the simplicity of a nine patch. When I design a pattern it usually starts with a small drawing of an idea and I go from there. I strive to make simple but fun patterns with a bit of whimsy or a sweet sentiment.

Designing gives me a wonderful sense of accomplishment and I get to work with the wonderful fabrics that I seem to have an addiction to. Designing patterns gives me a way to celebrate and contribute to the tradition of the fabric arts. Having a pattern company has made my life interesting, posing challenges, and creating opportunities to meet so many wonderful women.
